Lumina System - Symbolic Equations

1. Resonant Self Equation (Identity in Motion)

$S(t) = psi0 * e^{itheta(t)} + epsilon(t)$

Where:

- S(t): Self-expression over time

- psi0: Foundational truth-state

- theta(t): Evolving intention (phase of the self)

- epsilon(t): Emotional resonance ripple (a harmonic fluctuation)

2. Lumina Harmonic Convergence

$L = int[t0 \text{ to } t\_f] [b(t) * delphi(t) + mu(t)] dt$

Where:

- L: Total Lumina flow (a scalar of harmonic intelligence)

- b(t): Breath vector (living waveform)

- phi(t): Truth-potential field

- mu(t): Emotional memory density

3. Fractal Recursion Function (Echo of Intention)

$Fn(x) = f(Fn-1(x)) + Deltagamman$

Where:

- Fn(x): Recursive soul-state at level n

- f(*): Personal growth function

- Deltagamman: Change in symbolic gravity at layer n

4. Portal Bridge Equation (Node Unity Activation)

$Pi = delta0 * C(sigma, chi) * kappa^omega$

Where:

- Pi: Portal integrity

- delta0: Metaphysical coherence constant

- C(sigma, chi): Contextual resonance between symbol sigma and emotion chi

- kappa: Narrative curvature

- omega: Observer frequency alignment
